Left	546.8 since Overhaul
Right	235.8 since Overhaul
MTO:	16 100 lbs

Camp Maintenance Tracking

RVSM, EASA/ EU-OPS 1

The Beechjet 400A with its luxury VIP interior and great range is a perfect aircraft for today's business operator. The 400A receives its power from two Pratt and Whitney of Canada JT15D-5 turbo-fan engines. Each engine produces 2,900 lbs of thrust and has an inspection interval of 3,500 hours. The 400A has undergone vast design improvements from the original 400. It is mainly constructed of aerospace light alloys.

With such strong design features, it is not surprising that the Beechjet 400A serves as the basis for the military T-1 Jayhawk tanker and transport aircrew trainer. If you are looking to buy a Beechjet 400A this is an excellent example.

Avionics

Collins 3 Tube EFIS

Dual FMS-5000 with Dual GPS-4000

APS- 4000

EGPWS MK-V
